CERTIFICATIONS

AWS Solutions Architect – Professional · 2024 - 2027
AWS Data Engineer – Associate · 2025 - 2028
AWS AI Practitioner · 2024 - 2027
Microsoft Azure Fundamentals · 2026
MongoDB Solution Architect for AWS · 2024

KEY SKILLS

Cloud architecture

AWS, Azure, Cloudflare (Workers, Pages), serverless, containers, security, high availability, cost optimization

Generative AI

Amazon Bedrock, AI and voice agents, RAG, MCP, model evaluation, conversational AI

DevOps

Terraform, CDK, Kubernetes, Docker, CI/CD, Ansible, Linux

Consulting

Pre-sales, technical workshops, public speaking, enterprise customer relationships

AI-assisted development

Claude Code, Kiro, MCP, agentic development workflows

Programming

Python, TypeScript, Bash, C#

INTERESTS

Homelab, 3D printing, climbing.

Jon Loinaz Antón

Enterprise Solutions Architect at AWS · Cloud and Generative AI

Solutions architect with 7 years in cloud, DevOps and software engineering, the last 4 at AWS. I help large organizations take generative AI, serverless and modern operations from architecture to production. AWS Solutions Architect Professional, speaker and university lecturer.

EXPERIENCE

Amazon Web Services (AWS)

Madrid

Enterprise Solutions Architect

Dec 2024 - present

- Trusted technical advisor to 7 large accounts (pharma, consumer goods, delivery, healthcare): I define the architecture, review security, resilience and cost, and guide customer teams through to production.
- Lead generative AI adoption end to end: migrated a delivery unicorn's LLM platform to Amazon Bedrock, delivered customer-service AI agents for a pharmaceutical group, and won a head-to-head evaluation against two other cloud providers for AWS.
- Migrations and savings: migration program and landing zone for a pharmaceutical manufacturer, VMware exit to native services, and multi-region database cost reduction driven by billing analysis.
- Speaker and author: hands-on workshop at AWS Summit Madrid 2026 (60 attendees), official AWS workshop, article on the AWS technical blog and contributions to the Terraform AWS provider.

Solutions Architect

Sep 2022 - Dec 2024

- Pre-sales architect for SMB and mid-market customers in Spain: technical discovery, architecture design, workshops and Well-Architected Reviews, with a growing specialization in generative AI.

UNIR - International University of La Rioja

Online

Lecturer (Continuing Education)

Mar 2026 - present

- Teach the Microsoft Azure module in the Advanced Programme in Cloud Computing and tutor the cloud modules and capstone case in the Advanced Programme in DevOps & Cloud (fully online, two editions a year).

Openbank (Santander Group)

Madrid

DevOps Engineer & Cloud Architect

May 2021 - Sep 2022

- Scalable, highly available AWS infrastructure for a fully digital bank: infrastructure as code, CI/CD and production operations in a regulated environment.

Satlink

Madrid

R&D Engineer

Sep 2019 - May 2021

- Hardware and software design of products for fishing vessels: electronic prototypes, firmware and web applications.

EDUCATION

Master's Degree in DevOps

2022 - 2023

UNIR

BEng in Telecommunications Engineering (Electronics)

2013 - 2019

University of the Basque Country · Formula Student Bizkaia 2017-2019

OTHER

- Innovation award at the B24 Challenge (Euskaltel); 6th place at Formula Student UK; creator of LocalBuddy, a local meeting transcription tool used across AWS Iberia.
